

# MD-101: Managing Modern Desktops

## Course Overview

This course gets into managing modern desktops. Topics covered include planning a Windows 10 deployment, Windows 10 installation options, Windows Update as a service, user and device profiles, device enrollment with Intune and Azure, managing applications, Azure AD identity management, implementing compliance and device authentication, and implementing Windows 10 security.

<b><u>Course Introduction</u></b>	2m
Course Introduction	
<b><u>Chapter 1 - The Desktop Lifecycle</u></b>	23m
The Enterprise Desktop Life-cycle Model	
Planning and Potential Cost	
Building a Desktop Deployment Strategy	
Operation and Support	
Upgrading and Retirement	
Windows Store and Windows Store for Business	
Demo - The Windows Store and Windows Store for Business	
<b><u>Chapter 2 - Deployment and Assessment Tools</u></b>	1h 25m
Deployment Planning and Readiness Tools	
Application Compatibility Tools and Workarounds	
Demo - Application Compatibility Toolkit	
Deployment Tools for Windows 10	
Overview of the Microsoft Deployment Toolkit	
Demo - Setting up MDT	
Demo - Setting up MDT	
Tools Used with Traditional Imaging	
System Center Configuration Manager Overview	
Co-Management with SCCM and Intune	
Understanding Installation Types	
WDS Role in Server Manager	
Demo - LTI Thin Image Install using WDS	
<b><u>Chapter 3 - Upgrading to Windows 10</u></b>	1h 4m
Windows 10 Installation Methods	
Deploying Windows 10	
Intro to Windows Autopilot	
Windows Autopilot Deployment	
Windows Autopilot Deployment	
Demo - Creating a Windows Autopilot Deployment Profile	
Demo - Installing Windows 10 (High Touch Installation)	

Demo - Using DISM (Creating a Capture Image)  
Demo - Using DISM (Creating a Capture Image)  
In-place Upgrades  
Supported Upgrade Paths  
Performing a Windows 10 In-place Upgrade  
Demo - Performing a Windows 10 In-place Upgrade

**Chapter 4 - Migrating to Windows 10**

20m

Migration Considerations  
USMT  
USMT Migration Rules  
Demo - Migrating User State with USMT  
User State  
User Experience Virtualization (UE-V)  
Azure Enterprise State Roaming  
Demo - Azure RMS

**Chapter 5 - Post Deployment and Activation**

23m

Windows 10 Activation  
Windows Configuration Designer  
Demo - Windows Configuration Designer  
Demo - Windows Configuration Designer  
MDM Auto Enrollment with Azure AD Join

**Chapter 6 - Windows 10 Updates**

48m

Windows 10 Servicing Channels  
Windows 10 Servicing Options Deployment Rings  
Demo - Windows 10 Servicing Options Deployment Rings  
Applying Updates to Windows 10  
Windows Update Settings  
Demo - Windows Update Settings  
Using a WSUS Server to Deploy Updates  
Demo - WSUS  
Group Policy Settings for Configuring Windows Update  
Overview of Windows Insider Program

**Chapter 7 - Updates for Business**

17m

What is Windows 10 Update for Business?  
Configuring Windows 10 Update for Business  
Configuring Windows Update for Business with Group Policy  
Demo - Configuring Windows Update for Business with Group Policy  
Using Intune to Configure Windows Update for Business  
Overview of Desktop Analytics  
Desktop Analytics Compatibility Assessment

**Chapter 8 - Device Profiles**

14m

Profile Types for Devices  
Intune Device Profile Types  
Custom Device Profiles

Demo - Creating a Profile for a Kiosk  
Using Microsoft Intune to Monitor Device Profiles

### **Chapter 9 - User Profiles**

50m

What is a User Profile  
What is a User Profile  
Profile Types for Users  
Profile Extension for each Windows Version  
Configuring Folder Redirection  
Demo - Creating a Roaming Profile  
Demo - Folder Redirection

### **Chapter 10 - Azure AD**

20m

Overview of Azure AD  
Characteristics of AD DS  
Characteristics of Azure AD  
Compare Azure AD and AD DS  
Azure AD Premium P1&P2  
What is Azure AD Domain Services?

### **Chapter 11 - Azure AD Identities**

38m

Creating and Managing Azure AD Users  
Creating and Managing Azure AD Groups  
User Accounts in Azure AD  
User Roles and RBAC in Azure AD  
Demo - Creating an Azure AD User  
Demo - Using RBAC to Assign a Role in Azure AD  
Using Windows PowerShell Cmdlets for Azure AD Objects  
Creating Users by Using Bulk Import  
Using AD Connect to Synchronize from AD DS to Azure AD

### **Chapter 12 - Azure Identity Protection**

26m

Windows Hello for Business Deployment and Management  
Biometric Sign-in  
Azure AD Identity Protection Overview  
Azure AD Self-Service Password Reset  
Implementing MFA (Multi-Factor Authentication) in Azure AD  
Demo - Enable MFA for a Single Azure AD User  
Demo - Azure AD Self-Service Password Reset

### **Chapter 13 - Device Management and Enrollment**

32m

Modern Management  
Define an Integration Strategy  
Co-Management Overview  
Co-Management Requirements  
Overview of Migrating Group Policy to (MDM) Mobile Device Management  
Overview of MDM Migration Analysis Tool (MMAT)  
Demo - MMAT

**Chapter 14 - Intune Device Enrollment and Inventory** 56m

Managing Mobile Devices with Intune  
Device Management Lifecycle  
Activating MDM Services  
Intune Company Portal  
Supported Devices  
Deploying MDM Services  
Overview of Enrolling Windows 10 Devices in Intune  
Overview of Enrolling Android Devices to Intune  
Overview of Enrolling iOS Devices to Intune  
Overview of Intune Enrollment Rules  
Managing Corporate Enrollment Policy with Intune  
Demo - Integrate Azure and Intune in the Enrollment Process  
Device and Application Reporting

**Chapter 15 - Device Authentication, Intune Compliance, and Conditional Access** 49m

What is Azure AD Join?  
Prerequisites for Azure AD Join  
How to Join Devices to Azure AD  
Managing Azure AD Devices  
Manage and Monitor Devices Enrolled in Intune  
Intune Compliance Policy for Devices  
Using Intune to Deploy a Compliance Policy  
Creating and Managing Conditional Access Policies  
Monitoring Compliance Policies and Conditional Access  
How to Monitor Conditional Access  
Demo - Creating a Compliance Policy and a Device Configuration Profile

**Chapter 16 - Accessing Resources and Access Services** 58m

Overview of VPNs  
VPN Protocols  
Built-in VPN Client  
IPSec (IP Security)  
Always on VPN  
Demo - Creating a VPN  
Demo - IPSEC

**Chapter 17 - Application Management and Inventory** 44m

Types of Apps for Windows 10  
What is Mobile Application Management (MAM)  
Overview of Applications in MAM  
Overview of Configuration Manager for (MAM)  
Configuring and Managing MAM Policies in Intune  
Demo - How to Create and Assign App Protection Policies  
Implementing and Managing Apps with Intune  
App Management for Non-Enrolled Devices  
Office 365 ProPlus Deployment with Intune  
Demo - How to Inventory Apps in Intune

### **Chapter 18 - Application Deployment**

40m

Microsoft Intune App Lifecycle  
How to Deploy Applications with Intune  
How to Deploy Applications with Group Policy  
How to Deploy Apps with SCCM  
Demo - Group Policy App Deployments  
Demo - Intune App Deployments  
Overview of the Microsoft Store for Business  
Requirements for Using Microsoft Store for Business  
Demo - Microsoft Store for Business

### **Chapter 19 - Data Protection**

47m

What is Windows Information Protection?  
Planning Windows Information Protection  
Windows Information Protection Policies and Usage  
What is EFS (Encrypted File System)?  
Demo - EFS  
What is BitLocker?  
Comparing BitLocker and EFS  
Demo - BitLocker  
What is BitLocker To Go?  
Microsoft BitLocker Administration and Monitoring  
Overview of Azure Information Protection  
Configuring AIP Labels and AIP Policies

### **Chapter 20 - Windows Defender ATP**

48m

An Overview of Windows Defender  
Overview Windows Defender Application Guard  
Overview of Windows Defender Exploit Guard in Windows 10  
Overview of Windows Defender System Guard in Windows 10  
Overview of the Windows Security Center  
Overview of Windows Defender Credential Guard and How to Implement  
Using Windows Defender Antivirus  
Demo - Quick Scan Windows Defender Antivirus  
Implementing Windows Defender Firewall  
Implementing Windows Defender Firewall with Advanced Security  
Connection Security Rules  
Demo - Windows Defender Advanced Firewall

**Total Duration: 13h 25m**
